

## SCIENTIFIC PROGRAM

Saturday April 2nd 2022

09:00

Wellcome

### Session 1

*Antepartum*

**Achiron R. (Israel), Kamel R. (Egypt)**

09:20

**Kamel R.**

Fetal head station examined with transabdominal ultrasound as predictive factor for labor induction- **Egypt**

09:35

**Geron Y.**

Assessment of sonographic parameters for the prediction of successful external cephalic version - **Israel**

09:50

**Mappa I.**

Ultrasound guided cervical ripening balloon (CRB) placement and induction outcome- **Italy**

10:05

**Mappa I.**

Ultrasound and elastographic evaluation in mechanical induction with cervical ripening balloon (CRB) – **Italy**

10:20

**Hinkson L.**

External cephalic version for breech: new ultrasound parameters- **Germany**

10:35

**Hinkson L.**

Fetal Doppler changes with external cephalic version for breech- **Germany**

10:50

**Conversano F.**

New frontiers in automatic pelvimetry - **Italy**

11:05

**Di Pasquo E.**

Intrapartum assessment of the fetal cord size and labor outcome – **Italy**

11:20

**Lu A.**

Maternal cardiovascular assessment before labor: May be useful in predicting fetal distress- **Italy**

11:35

**Stampalija T.**

Umbilical vein: reproducibility and proposal of a protocol as a pre-labor admission test- **Italy**

11:50

**Henrich W.**

Does it make sense to evaluate the lower uterine segment before VBAC? - **Germany**

### Session 2

*Intrapartum*

**Lees C. (United Kingdom), Eggebo T. (Norway)**

12:05

**Selmin A.**

Intrapartum ultrasound for assessment of fetal progression: an RCT to evaluate the variation of parameters according to maternal position and pelvis (MaPP Study) – **Italy**

12:20

**Kalache K.**

Focus on Markers reflecting fetal head station- **Qatar**

12:35

**Rodriguez  
Gonzales E.**

Angle of progression and head-perineum distance in maternal lateral position compared to semi-recumbent position- **Switzerland**

13:00-14:15 *lunch break*

*Intrapartum*

**Gilboa Y. (Israel), Henrich W. (Germany)**

14:15

**Dall'Asta A.**

Is the clinical diagnosis of the fetal head station influenced by the Occiput position: a prospective ultrasound study - **Italy**

14:30

**Lees C.**

Validation of the "intrapartum app": prediction of mode of delivery- **United Kingdom**

14:45	<b>Vaisbuch E.</b>	Application of intrapartum ultrasound as a predictor of delivery mode in nulliparous women with a second stage of labor longer than 4 hour- <b>Israel</b>
15:00	<b>Lees C.</b>	Using the “intrapartum app” to estimate time to delivery- <b>United Kingdom</b>
15:15	<b>Dall’Asta A.</b>	Artificial Intelligence for automatic classification of anterior/posterior/transverse occiput positions- <b>Italy</b>
15:30	<b>Dall’Asta A.</b>	Does intrapartum ultrasound before active pushing predict rotation in OP fetuses? - <b>Italy</b>
15:45	<b>Dall’Asta A.</b>	The usefulness of intrapartum ultrasound before a trial of vacuum in OP persistent fetuses- <b>Italy</b>
16:00	<b>Kalache K.</b>	Ultrasound before Operative Vaginal Delivery- <b>Qatar</b>
16:15	<b>Eltaweel N.</b>	Ultrasound scan diagnosis of Bandl’s ring as a marker of labour dystocia, case series- <b>United Kingdom</b>
16:30	<b>Henrich W.</b>	Conjoined twins: Prenatal diagnosis and US-guided obstetrical management- <b>Germany</b>
16:45	<b>Masturzo B.</b>	Vacuum delivery in all-four position: is this a revolution in obstetrics? - <b>Italy</b>
<b>Session 3</b>	<b>Postpartum</b>	<b>Tutschek B. (Switzerland), Kalache K. (Qatar)</b>
17:00	<b>Lau W.</b>	Manual reduction of uterine inversion under ultrasound guidance- <b>China</b>
17:15	<b>Lees C.</b>	Catheter balloon position in labour and urinary complications- <b>United Kingdom</b>
17:30	<b>Hinkson L.</b>	Preoperative sonographic bladder assessment before cesarean to avoid bladder injury- a case to consider- <b>Germany</b>
17:45	<b>Lees C.</b>	Point of care ultrasound & diagnosis of a rare cause of peripartum collapse- <b>United Kingdom</b>
18:00	<b>Di Pasquo E.</b>	Sonographic measurement of the IVC in women with postpartum hemorrhage - <b>Italy</b>
18:15	<b>Masturzo B.</b>	Uterine balloon tamponade in postpartum hemorrhage under ultrasound guidance: a retrospective cohort analysis- <b>Italy</b>
18:30	<b>Rizzo G., Ghi T.</b>	<b>Closing Remarks</b>
